## Summary

Frontend Developer since February 2022.

I have experience with HTML, CSS, JavaScript, TypeScript, React, Angular 10+, Tailwind, Node.js, Bootstrap, API Rest, NgRx, SQL, C#, .NET, Git, Scrum, Kanban.

## Experience

### Frontend Developer

eXpand Omnichannel Customer Journey Software (SaaS)

Jul 2023 - Present

I contribute to the development of a SaaS complex omnichannel and administration web application platform. This platform featured robust reporting capabilities, real-time agent conversation monitoring, advanced administration panel for streamlined agent and users' creation, and comprehensive statistics tracking for in-depth insights into performance and engagement across digital channels.

With skills in tools like Angular, HTML5, CSS, JavaScript, TypeScript, RxJS, NgRx, Material Design, Kanban, Scrum, AWS.

### Full-stack Developer

CartaSur (Fintech)

Feb 2022 - Jul 2023 (1 year 6 months)

Backend: Application development using C#, SQL Server, and .NET Core, Creation of stored procedures, triggers, and jobs in SQL Server.

Frontend: Angular, TypeScript, Bootstrap, and Angular Material. Utilization of RxJS for managing asynchronous data flows and reactive programming. Design and development of attractive and responsive user interfaces using Angular features such as directives, pipes, and data binding.

## Education

### Udemy

Angular Master, Computer Programming

2023 - 2023

components, services, routing, Angular Material, state management with RxJS.

### EducacionIT

C# Developer, Computer Technology/Computer Systems Technology, Computer Programming

2022 - 2022

Development of web applications that integrate Bootstrap, ADO.NET, Entity Framework, and LINQ.
